

ICT LAB TASKS (BCS-1J)

LAB 1 TASKS

Course: ICT (CL-1000)

Instructor: Syeda Tehreem

TASK 01: CREATE A CLASS TIMETABLE TABLE

Create the following information in a properly formatted table in MS Word.

Day	9:00–10:00	10:00–11:00	11:00–12:00
Monday	ICT	English	Mathematics
Tuesday	Programming	ICT	Communication Skills
Wednesday	Mathematics	Programming	ICT
Thursday	Communication Skills	English	Programming
Friday	ICT	Mathematics	English

- Apply borders to the complete table and shade the heading row.
- Center-align all table content.
- Save the document as YourRoll#_Task1.

TASK 02: DEFINE CLOUD COMPUTING AND FORMAT THE DOCUMENT

Define Cloud Computing in your own words and write its main characteristics.

- Use Candara font, size 12 for the body text.
- Write the heading “Cloud Computing” in size 14, bold, and underlined.
- Center-align the heading.
- Use Dark Blue for the heading and Sky Blue for the body text.
- Add your roll number in the footer and insert a page number.
- Export the completed document as a PDF.

TASK 03: CREATE A NOTICE FORMAT

Create a one-page college notice in MS Word using the following content:

NOTICE

ICT LAB ORIENTATION

Date: 19 August 2026

All students are informed that an ICT laboratory orientation session will be conducted in the computer lab.
Students should arrive on time and bring their lab notebooks.

Venue: Computer Lab

- Use a border around the notice.
- Make the main heading bold and centered.
- Use suitable font sizes for the heading and body.
- Add a simple horizontal line below the main heading.
- Save the file as YourRoll#_Task3.

TASK 04: CREATE A FORMAL APPLICATION LETTER

Create a one-page formal application in MS Word for permission to attend an educational technology workshop.

- Include sender information, date, receiver information, subject, salutation, body, closing, and signature.
- Use bold formatting for the subject line.
- Use proper paragraph alignment and spacing.
- Add a footer containing your roll number.
- Proofread the document and save it as YourRoll#_Task4.

TASK 05: CREATE AN EXCEL SALES SHEET

Open Excel and enter the following data:

Product	Units Sold	Unit Rate
Keyboard	12	1500
Mouse	18	900
USB Drive	10	1800
Headset	8	2500
Webcam	6	3200

- Add a fourth column named Total Sale.
- Use a formula to calculate Units Sold $\times$ Unit Rate for every product.
- Use SUM to calculate the grand total of all sales.
- Use AVERAGE to calculate the average unit rate.
- Format the rate and total-sale columns as currency/number values.

TASK 06: USE IF, AND, OR AND NOT FUNCTIONS

Create an Excel worksheet using the following student record:

Student	Attendance %	Quiz	Department
Hina	82	76	ICT
Usman	68	81	Business
Maham	91	88	ICT
Zain	55	42	Business
Areeba	74	69	ICT

- Use IF to return “Eligible” when Attendance % is 70 or above; otherwise return “Not Eligible”.
- Use AND to return “Strong” when Attendance % is at least 80 AND Quiz is at least 70.
- Use OR to return “Needs Support” when Attendance % is below 60 OR Quiz is below 50.
- Use NOT to identify students who are NOT from the ICT department.
- Create a column for each result.

TASK 07: CREATE A RESULT SUMMARY AND CHARTS

Use the following marks to prepare a simple result sheet in Excel:

Student	English	ICT	Mathematics
Ali	72	81	68
Sara	64	75	79
Ahmed	88	70	84
Ayesha	91	89	86
Bilal	55	62	58

- Add a Total Marks column using SUM.
- Add an Average Marks column using AVERAGE.
- Add a Result column using IF: Pass if Average Marks is 50 or above; otherwise Fail.
- Create a column/bar chart comparing the Total Marks of all students.
- Create a pie chart showing the number of Pass and Fail students.

TASK 08: CREATE A SIMPLE INVENTORY SUMMARY

Create an Excel inventory worksheet using the following data:

Item	Opening Stock	Received	Issued
Notebook	40	25	18
Pen	60	30	22
Marker	35	20	15
Folder	28	18	12
Calculator	15	8	5

- Add a Closing Stock column using Opening Stock + Received – Issued.
- Use SUM to calculate total Opening Stock, Received, Issued, and Closing Stock.
- Use conditional formatting to highlight Closing Stock values below 15.
- Create a bar chart comparing the Closing Stock of each item.
- Save the workbook as YourRoll#_Task8.xlsx and review the formulas.
